

Robin Edwan

Executive Bio

Robin Edwan is a UAE-based business and operations professional with over a decade of experience in environmental services, business development, and client relationship management.

He is the Founder and Managing Director of Eco Technology Environment Protection Services L.L.C. in Ajman, a municipality-approved environmental services company specializing in grease management systems, environmental compliance services, and operational solutions for restaurants and commercial facilities across the UAE.

Through this role, Robin has led the development of operational systems, municipal coordination processes, and service delivery frameworks that support regulatory compliance and sustainable infrastructure practices. His work has involved direct collaboration with local authorities, facility operators, and private sector stakeholders to ensure environmental standards and operational efficiency.

Prior to founding Eco Technology, Robin worked with Ajman Bank as a VIP Relationship Manager, where he managed high-value client portfolios exceeding AED 200 million. In this role he developed strong expertise in client advisory, financial services coordination, and high-level relationship management.

Robin combines entrepreneurial leadership with operational discipline, focusing on building efficient systems, strengthening client relationships, and developing practical solutions that support both business growth and environmental responsibility.

He is currently open to executive and senior management opportunities in operations leadership, business development, and sustainability-related sectors within the UAE.
