## PROFESSIONAL SUMMARY

Environmental operations and sustainability professional with 10+ years of UAE experience delivering regulatory-compliant environmental services and operational sustainability solutions across commercial sectors. Founder of a municipality-approved environmental services company specializing in wastewater protection, grease management systems, and environmental compliance.

Experienced in translating sustainability frameworks such as ISO 14001 and ESG principles into practical operational systems, ensuring regulatory alignment, environmental risk reduction, and measurable performance improvements. Strong background in stakeholder coordination, municipality engagement, and operational efficiency optimization.

## CORE SKILLS • Environmental Compliance & ISO 14001

- Sustainability Implementation (Operational ESG)
- Waste Management & Circular Economy
- Municipality & Regulatory Coordination
- Environmental Risk Management
- Process Automation & Operational Efficiency
- Stakeholder Engagement & PPP Coordination
- Sustainability KPIs & Reporting Support

## PROFESSIONAL EXPERIENCE

### Founder & Operations Manager – Eco Technology (2016–2024)

- Established and scaled a municipality-approved environmental services company delivering compliance-driven wastewater and grease management solutions
- Delivered environmental compliance services across high-volume commercial facilities including restaurants, hospitality venues, and industrial kitchens
- Managed a portfolio of 80+ commercial clients ensuring regulatory compliance and service continuity
- Implemented ISO 14001-aligned workflows improving audit readiness and environmental performance
- Coordinated with municipal authorities to ensure environmental compliance, approvals, and adherence to wastewater protection regulations
- Reduced administrative workload by ~40% through process automation tools (Jobber, Google Sheets, Power Automate)
- Led environmental risk mitigation initiatives preventing FOG contamination in municipal drainage systems

### VIP Relationship Manager – Ajman Bank (2010–2016)

- Managed AED 200M+ VIP client portfolio ensuring governance, service quality, and client retention • Improved client retention through structured relationship strategies and service optimization
- Coordinated financial operations, stakeholder communication, and cross-functional service delivery

## KEY ACHIEVEMENTS

- Built and maintained 80+ recurring client accounts across commercial sectors
- Reduced operational workload by ~40% through automation and process optimization
- Secured municipality approval and maintained regulatory compliance alignment
- Maintained strong compliance record with no major regulatory violations

## ENVIRONMENTAL & REGULATORY EXPOSURE

- UAE municipality environmental compliance requirements
- Wastewater protection and FOG management systems
- Operational implementation of ISO 14001 principles
- Environmental risk mitigation in commercial facilities

## ESG & SUSTAINABILITY EXPERIENCE

Applied ESG principles within operational environments including waste management, compliance systems, and environmental risk reduction. Supported sustainability KPI tracking, compliance audits, and environmental performance monitoring aligned with UAE regulations and ISO 14001 frameworks.
